

Business Solutions for Information Agility

Service Overview

Concord Solutions, LLC is a provider of management and information technology services and business solutions to a broad range of Fortune 500 clients. We serve our clients by delivering services and solutions focused on each one's specific needs, with particular emphasis on developing and integrating information systems, operating and improving technology, and building business processes.

We focus our core business systems integration, application development, and infrastructure services to enable clients to accelerate growth, streamline operations, and create new levels of customer value.

Management Consulting

The Management Consulting practice offers business strategy, business case development, performance measurement analysis and design, business process/solution analysis and design, and organizational alignment. Each offering is designed to assess your business from three perspectives: people, process, and solutions/technology.

Enterprise Solutions

Concord Solutions works closely with the leading Enterprise Resource Planning (ERP) provider - SAP and Microsoft Dynamics. Concord Solutions delivers end-to-end local and global enterprise solutions, including package evaluation and selection, implementation, production support, upgrades and performance-enhancing extensions like supply chain, APO, and human resources. Our dedicated ERP practice leverages highly skilled resources across industries and applications, so that we can quickly deliver smart and innovative enterprise solutions

Business Intelligence

Business Intelligence solutions use leading information technology to collect, consolidate and provide in-depth analysis of company data to enhance day-to-day decision making. By implementing Business Intelligence systems, we help organizations reduce costs by leveraging the information-value in existing systems, increasing productivity by making information quickly accessible across the organization

Microsoft Dynamics™ NAV

Microsoft Dynamics™ NAV is an integrated, adaptable business management solution that allows organizations to make business decisions with greater confidence. Microsoft Dynamics NAV works like, and with, familiar Microsoft software, automating and streamlining business processes and connecting organizations with global customers, business partners and subsidiaries in a way

Microsoft Dynamics™ CRM

Microsoft Dynamics™ CRM is the customer relationship management (CRM) system that gives customer-facing employees the information they need to truly impress customers. With Microsoft CRM, organizations can create a centralized repository of customer data that sits alongside Microsoft Office and Microsoft Office Outlook

Microsoft Dynamics™ GP

Microsoft Dynamics™ GP is a broad-based, integrated solution for financial management, business analytics, e-commerce, supply chain management, manufacturing, project accounting, field service, customer relationship management, retail management, and human resource management.
